

# Arsenal Biosciences' Expanded Access Policy

“Expanded Access” refers to the use of an investigational product outside of a clinical trial for potential treatment of a serious or life-threatening condition. Arsenal Biosciences (‘ArsenalBio’) is developing autologous integrated circuit T cell (ICT) products for patients with solid tumors. Consistent with our commitment to bring innovative, safe, and effective products to patients, we are focused on enrolling and conducting the clinical trials necessary to gain regulatory approvals to make our products broadly available as quickly and safely as possible. Participation in one of our clinical trials is the best and preferred route to access these investigational products. ArsenalBio does not currently have any active Expanded Access protocols nor do we currently provide access to our investigational products on an Expanded Access basis. We encourage patients interested in our investigational products to learn more about our ongoing studies by visiting [clinicaltrials.gov](https://clinicaltrials.gov).

Treating physicians may request information about ArsenalBio’s Expanded Access policy by contacting our clinical trials team:

By phone  
[650-446-4874](tel:650-446-4874)

By email  
[clinicaltrials@arsenalbio.com](mailto:clinicaltrials@arsenalbio.com)

ArsenalBio will respond to inquiries within 5 business days from receipt.

In the event ArsenalBio decides to consider making one or more of its investigational candidates available for patients who have a serious or life-threatening condition through an Expanded Access program, general criteria to be considered may include: availability of alternative products, the potential risks and benefits to the patient, supply manufacturability, and potential interference with ArsenalBio’s ongoing clinical trials. All requests would be evaluated on a case-by-case basis in a fair and equitable manner.

*This policy shall not serve as a guarantee of access to any specific investigational candidates by any individual patient. ArsenalBio reviews its policies from time to time to ensure conformity with applicable laws and regulations. We reserve the right to revise this policy at any time.*
